Review of Australian Species of *Megastigmus* (Hymenoptera: Torymidae) Associated with *Eucalyptus*, with Descriptions of New Species: ERRORS AND OMISIONS

1Mikdat Doğanlar, 2Errol Hassan

1Mustafa Kemal University, Agriculture Faculty, Plant Protection Department, 31034 Antakya-Hatay, TURKEY

2Integrated Crop Management, School of Land Crop and Food Sciences, The University of Queensland Gatton, Gatton, Queensland 4343, Australia.

In order to validate several new species it should be published the following list of errors and omissions occurring in Doğanlar and Hassan (2010).

The following corrections are resulted of a critical checking by Dr. J.S. Noyes:

1- P 5060 L8 from bottom.. insert after ANIC: and ICMKU (Insect Collection of Mustafa Kemal University)
3- P 5109 [Megastigmus thitipornae n.sp.] insert after Material Studied: ICMKU
4- P 5113 L6 from bottom insert after ‘same data as the holotype.’: ICMKU:
5- P 5115 L9 insert after as Holotype; : ICMKU:
